

Providing options and support for the families of children with emotional and mental health needs has long been central to the work of Intermountain. In recent years, we have focused, more than ever, on intervention and collaboration, resulting in an array of services that reach into communities across Montana and beyond. More than 1,300 children and families were served by Intermountain in 2012!

We believe healthy families are the bedrock of a healthy society.

Intermountain's unique treatment model is the clinical means through which we help children and families achieve positive change. Time-tested and clinically sound, our 30 year-old treatment model is applied through a variety of programs:

- ◇ Family Based Services
- ◇ Intensive Day Treatment
- ◇ Outpatient Therapy
- ◇ Psychiatry Clinic
- ◇ Residential Programs
- ◇ School Based Services
- ◇ Wraparound Services

‘The biggest thing I learned about Intermountain is they have a lot more ready resources...and they care not just about the child but about the whole family.’
- Adoptive Parent
